March 2026

Private & Confidential – Not For Distribution

Disclaimer

The company identified herein as JBF Global Europe (the "Company") has prepared this information presentation (the "Information Presentation") and has issued it confidentially to a limited number of recipients for the sole purpose of assisting them in deciding whether they wish to proceed with further investigation and evaluation in connection with a proposed transaction involving the Company. The issue of this Information Presentation shall not be taken as any form of commitment on the part of the Company to proceed with any transaction. This Information Presentation is not intended to form the basis of any investment decision. Interested recipients should carry out their own due diligence review.

This Information Presentation is provided solely for the information and exclusive use of the recipient, and may not be communicated, photocopied, reproduced, disclosed, or distributed to any other person at any time except as agreed in writing by the Company.

The Company in providing this Information Presentation makes no representation or warranty, express or implied, as to the completeness or accuracy of any information contained herein, and no responsibility or liability is or will be accepted by the Company or its officers, employees, advisors or agents in relation thereto. In accepting delivery of this Information Presentation, the recipient agrees that no information contained herein or in any other written or oral communication transmitted or made available to the recipient in connection with this Information Presentation is, or shall be relied upon as, a promise or representation, whether as to the past or the future, and no liability will attach except as provided in a definitive agreement between the recipient and the Company. The recipient shall hold the Company harmless against any liability for damage or loss that may result from the recipient relying upon this Information Presentation. The recipient shall undertake and conduct its own review and due diligence of the Company and the terms and conditions of the Transaction, including all uncertainties, merits and risks involved. All statements contained in this Information Presentation shall be verified by the recipient through independent review and due diligence, and the recipient agrees that all such statements and any omissions do not constitute any form of representation or warranty as to the matters stated or otherwise. This Information Presentation includes forward-looking statements. The Company has based these forward-looking statements on its current expectations and projections about future events. These forward-looking statements are subject to risks, uncertainties, and assumptions about the Company and the business environment. The Company's actual results of operations may differ materially from the forward-looking statements. The Company undertakes no obligation to update or revise this Information Presentation. The recipient shall place no reliance upon any forward-looking statements contained herein and shall hold the Company harmless against any liability for damage or loss which may result from relying upon such statements. Past performance is not necessarily indicative of future results, and there can be no assurance that any proposed transaction will achieve comparable results or that targeted returns will be met. The words "include", "includes", "including" and other words of similar import are meant to be illustrative rather than restrictive.

This Information Presentation is not an offer or invitation to sell or acquire any shares, securities or any assets or other interests of whatever nature, and nothing herein shall be construed as an offer to sell or acquire any shares, securities or any assets or other interests of whatever nature. It does not constitute any form of commitment or recommendation on the part of the Company. A proposal regarding the Transaction will only give rise to any contractual obligations when a definitive transaction agreement has been executed.

Any proposed transaction described or contemplated in connection with this Information Presentation is subject to legal and regulatory requirements applicable in the jurisdiction where the recipient is resident, including applicable European Union laws and regulations, and the recipient shall be solely responsible for complying with such requirements.

The Company reserves the right to negotiate with one or more interested parties at any time and to enter into a definitive agreement in respect of the Transaction or any related transaction(s) with any party without prior notice. In addition, the Company reserves the right to terminate, at any time, further participation in the process by any party without arranging any reason therefore and without any liability whatsoever.

Why Acquire vs. Build

Why Acquire JBF Global Europe vs Build a New European PET Platform

 Time to Market	 Capital Intensity	 Customer Relationships	 Regulatory Position	 Operational Risk
✓ ACQUIRE ✓ Immediate access to EU customer contracts and established supply chains	✓ ACQUIRE ✓ Acquisition at discount to replacement cost	✓ ACQUIRE ✓ Active customer relationships: Nestlé, Coca-Cola, Danone, Refresco & others	✓ ACQUIRE ✓ EU-located rPET production aligned with EU circularity mandates	✓ ACQUIRE ✓ Proven asset, operating since 2013, expanded 2018–19. No construction risk. ✓ Operational readiness to capture next upcycle
✗ BUILD ✗ Circa 2 years permitting, construction & commissioning	✗ BUILD ✗ Greenfield replacement cost in Europe: €250m+*	✗ BUILD ✗ Multi-year customer qualification cycles required	✗ BUILD ✗ Regulatory permitting uncertainty; timeline risk ✗ Trade defence risks	✗ BUILD ✗ Full construction execution risk; technology & ramp-up uncertainty
2 Year Head Start	Capital Saving	Immediate Blue-Chip Base	Compliance-Ready Platform	Zero Execution Risk

*: Based on replacement cost estimated by PROTIVITI in 2025

Investment Highlights

Five compelling reasons to invest in JBF Global Europe, one of Europe's most modern large-scale PET & rPET production platforms

Strategic European Production Platform

Modern 432k Mt nameplate PET & rPET facility located in the Antwerp–Geel chemical cluster, co-commissioned in 2013 and expanded in 2018–19. One of the most modern large-scale PET assets in Europe, operating across two continuous production lines with significant capacity headroom.

Immediate Access to EU Packaging Customers

Established supply relationships with leading European converters and brand owners including Nestlé, Coca-Cola, Danone and Refresco. 34% of CY26 capacity already contracted, with direct access to Western European markets within <2 weeks order-to-dispatch.

Structural Cost Advantage

Direct co-location with INEOS Aromatics provides secure and competitive PTA supply, reducing inbound logistics costs and feedstock lead times to near-zero. Energy intensity of 120 kWh/Mt and carbon footprint ~30% below EU peers.

Operational Transformation Underway

Financial restructuring completed and governance reset to a professional European operating model. Strengthened leadership team in place, with execution focused on utilisation ramp-up, margin discipline and cash generation.

Clear Path to EBITDA and Cash Generation

Utilisation ramp-up from 51% (FY26) to 82% (FY29) drives EBITDA recovery to €20.9m. Breakeven at 290kt; incremental volumes deliver meaningful EBITDA with no additional fixed costs.

Blue-Chip Customer Portfolio and Contracted Volumes

34% of CY26 Production Capacity Already Secured Through Contracted Volumes

Sales Volume (Mt) – Monthly Evolution FY24–FY27

Summary of “Contracted” Volumes for CY26 by customer (Mt)

Customer/Group	Segment	Sale type	CY26 Volume
Customer 1	Brand Owner	Fixed price	12,225.00
Customer 2	Preform Convertor	Fixed price	3,000.00
Customer 3	Preform Convertor	Committed volume	1,750.00
Customer 4	Preform Convertor	Contract	35,500.00
Customer 5	Convertor	Contract	12,000.00
Customer 6	Brand Owner	Contract	11,825.00
Customer 7	Distributor	Contract	1,700.00
Customer 8	Distributor	Fixed price	3,500.00
Customer 9	Preform Convertor	Contract	2,400.00
Customer 10	Brand Owner	Contract	1,800.00
Customer 11	Preform Convertor	Contract	1,650.00
Customer 12	Food Packaging	Contract	3,000.00
Customer 13	Brand Owner	Contract	5,058.00
Customer 14	Food Packaging	Contract	13,000.00
Customer 15	Distributor	Contract	8,750.00
Customer 16	Brand Owner	Contract	2,800.00
Customer 17	Preform Convertor	Contract	24,500.00
Customer 18	Food Packaging	Contract	825.00
TOTAL			145,283.00
TOTAL Capacity			432,000.00
% of Contracted Vol.			34%

Pending Paul's sign-off Customer classification list (Brand Owner / Convertor / etc.) to be confirmed

01 | Executive Summary

Why JBF Belgium is Interesting (1/2)

JBF Global Europe is a strategic European PET production platform offering immediate market access, advanced technology, and significant operating leverage.

A STRATEGIC EUROPEAN INDUSTRIAL ASSET

JBF Global Europe operates one of the most modern and energy-efficient PET production facilities in Europe, located in the Antwerp–Geel industrial cluster. The asset:

- Serves leading European converters in food and consumer packaging
- Strategically positioned to substitute imported PET into the European market (c.30–40% of EU demand supplied by imports)
- Integrated rPET capability aligned with increasing EU recycled content requirements

This asset strengthens European industrial resilience and EU supply security.

STRONG INDUSTRIAL FUNDAMENTALS IN A CYCLICAL MARKET DISLOCATION

Recovery execution-led. Business plan assumes:

- No demand rebound
- No pricing recovery
- Continued structural overcapacity for 2–3 years

Key structural advantages include:

- Modern, low-cost technology base (commissioned 2013; expanded 2018–19)
- Strategic location within the Antwerp chemical and logistics hub
- Co-location with INEOS for secure and competitive feedstock access
- Immediate operating platform without the construction and ramp-up risk of greenfield development
- Incremental volumes deliver meaningful EBITDA at no extra fixed costs

A CREDIBLE EXECUTION-LED RECOVERY

EBITDA recovery is gradual, observable and conservative. The plan does not rely on market tailwinds.

Management has:

- Completed financial restructuring and operational stabilisation
- Reset governance to a professional European operating model
- Strengthened commercial, finance and procurement leadership
- Secured production volumes with blue-chip European customers.

Execution priorities:

Utilisation | Margin | Cash

LIQUIDITY AS THE ENABLER

Working capital availability has historically constrained operations — additional liquidity unlocks the platform's underlying earnings power.

Additional liquidity (estimated €25–50m release from feedstock supply optimisation) is expected to:

- Support utilisation ramp-up
- Enable improved customer payment terms
- Unlock fixed-cost absorption
- Accelerate EBITDA growth and cash generation

Recovery is execution-led. The plan assumes no demand rebound, no pricing recovery, and continued structural overcapacity for 2–3 years.

Why JBF Belgium is Interesting (2/2)

Leading PET & rPET Resin Producer with Direct Access to European Markets via Co-location with INEOS in Geel

MANUFACTURING CAPABILITIES

Best-in-class Asset Capabilities

432k Mt

Nameplate Manufacturing Capacity • Uhde Inventa-Fischer (ThyssenKrupp) Technology

PET PRODUCTION LINES

Line 1 — VPET **Line 2 — rPET (FTR®)**

Virgin PET / MtR® rPET blend / FTR®

~1,200 Mt/day Up to 30% PCR

APE 80 / APE 84 rPET blend grades

Bulk / Big bags Bulk / Big bags

LOGISTICS & STORAGE CAPABILITIES

18

Automated Platform

- ✓ Automated Silos
- ✓ 06:00–22:00h
- ✓ 5 days/week
- ✓ Silo trucks 22 min
- ✓ Sea bulk 26 min
- ✓ Bagging 35 Mt/h
- ✓ Raw materials 3,000 m²
- ✓ Finished goods 600 m²
- ✓ MEG tanks x3

LEADING EUROPEAN PET & rPET RESIN PLATFORM WITH FAST CUSTOMER ACCESS

432k Mt

86

<2 weeks

INEOS

Annual Capacity Full-time employees

Customer order to dispatch (EU)

Co-located PTA supply

- Two PET production lines (1 MtR®, 1 FTR®) with 432k Mt nameplate capacity, supporting virgin PET and rPET blends (up to ~30% PCR)
- Integrated feedstock supply via co-location with INEOS, ensuring secure and competitive PTA sourcing
- Prime location in the Antwerp chemical cluster, enabling efficient distribution across mainland Europe and exports via the Port of Antwerp (<50 km), with <2 weeks order-to-dispatch
- Highly automated logistics infrastructure (18 silos, 22–26 min loading cycles) supporting efficient outbound distribution
- Lean operating platform (86 FTEs) with utilisation currently 60%, providing significant scalability as volumes increase

KEY OPERATIONAL KPIs

Strengthening European Market Reach

TODAY

250k Mt/Year

rPET <5% of sales

FY29

>350k Mt/Year

rPET >15% of sales

KEY VALUE DRIVERS

Large-scale PET & rPET platform with 432k Mt nameplate capacity across 2 continuous production lines, offering strong operating leverage

Integrated and secure PTA supply through direct co-location with INEOS

Prime European location enabling <2 weeks order-to-dispatch across Europe

Modern European PET platform with significant capacity, strong logistics access and operating leverage

02 | Strategic European PET Production Platform

A Structurally Critical Asset in the European PET Landscape

Structural Advantages in a Consolidating European Market

Modern & reliable asset base

- **One of the newest large-scale PET production assets in Europe, with few comparable greenfield opportunities** remaining due to permitting, ESG and capital constraints.
- **State-of-the-art, energy-efficient facility**, designed to operate at high uptime and low variable cost.
- **Structural advantage versus older, legacy European plants** facing higher energy intensity and maintenance capex.

Strategic Antwerp location

- Central European location enabling **efficient access to key raw materials and core EU end-markets**
- Immediate proximity to **the Port of Antwerp**, one of Europe's largest logistics hubs.
- **Logistics advantage** vs imported PET and peripheral EU production, with shorter lead times and lower freight exposure.

Competitive feedstock access

- **Direct co-location with INEOS Aromatics** ensures secure and reliable PTA feedstock supply.
- **Reduced exposure to global supply chain** disruptions and import bottlenecks.
- **More predictable cost structure** compared to producers relying on long-lead-time or imported feedstock.

Ability to displace imports and weaker EU assets

- Well positioned to **gain market share** as European capacity rationalises and import dependency remains high.
- Integrated local rPET capability **supporting increasing recycled content demand**
- Ability to supply **food-grade recycled content**, reducing Europe's reliance on imported rPET.

Up to 30% PCR content single pellet solution capabilities.

PET's carbon footprint is 80% lower than glass or aluminium.

JBF GE 30% less CO₂ vs. EU peers.

Modern High-Performance PET & rPET Platform

Advanced Production Technology and Integrated Logistics Supporting Scale, Flexibility and Circularity

Industrial Backbone – Advanced PET & rPET Production Platform

- **Nameplate capacity: 440 ktpa** PET & rPET across dual large-scale continuous production trains
- **Commissioning & upgrades:** Site commissioned **2013**, capacity expansion and debottlenecking **2018–2019**
- **rPET integration:** Capability to produce **up to 30% rPET single-pellet** through integrated polymerisation (food-grade capable)
- **Operational availability: 84% plant availability** (Dec-25), reflecting high mechanical reliability
- **Utilisation level: 60% actual load**, with significant headroom for volume ramp-up
- **Process yield: 100% realised yield** (Dec-25), minimal non-prime output (2%)
- **Maintenance discipline:** Preventive / corrective maintenance ratio = 73x (LTM), indicating asset health and low wear. €870k/month (€50/Mt) average maintenance program over the last six months (L6M), including €600k related to the Line 1 discage repair investment.

Strategic Integration & Structural Cost Advantage

Feedstock integration: Direct co-location **with INEOS Aromatics (PTA supplier)**, reducing inbound logistics cost and feedstock lead time to near-zero

Logistics hub: Location within the Antwerp-Geel industrial cluster, **<50 km from Port of Antwerp**, enabling multi-modal distribution (road / rail / barge)

Dispatch performance: 95% transport on-time performance (Dec-25), supporting high service reliability to EU customers

Energy intensity: **120 kWh/Mt** electricity and **2 GJ/Mt natural gas**, structurally below EU legacy PET assets

Carbon footprint: ~0.1 tCO₂/Mt PET, c. **30% lower than EU peers** due to energy efficiency and integrated logistics

Smart logistics

Smart storage

High-performance bagging machines

Best PET technology (MtR™ and FTR™)

440 ktpa modern PET & rPET platform, best-in-class energy efficiency and carbon footprint, strategically located within the Antwerp industrial cluster

Strategic Advantages of a Belgian Production Platform

Strategic EU Manufacturing Base · Zero Intra-EU Tariffs · rPET Leadership

Central European location enabling EU-wide customer coverage

50 km from Europe's #2 container port — unmatched export gateway

- Port of Antwerp-Bruges handled 278 million nes in 2024 (+2.3% YoY), reaching 98% of Rotterdam's container volume — the narrowest gap in history (source: Port of Antwerp-Bruges annual results, Jan. 2025)
- Antwerp holds 30.6% market share in the Hamburg–Le Havre Range, Europe's dominant trade corridor — Geel sits 50 km away with direct motorway access (source: Port of Antwerp-Bruges, 2024)
- Antwerp hosts Europe's largest integrated chemical cluster, providing direct access to feedstocks, logistics operators and infrastructure.
- Belgium ranked 7th globally in the World Bank Logistics Performance Index 2023, with infrastructure score 4.1/5 — top 10 in the EU (source: World Bank LPI 2023)

EU circularity mandates create structural demand for rPET

- EU Single-Use Plastics Directive (SUPD): minimum 25% rPET in PET beverage bottles from 2025, rising to 30% for all plastic bottles by 2030 — mandatory, not voluntary (source: EU Directive 2019/904, European Commission)
- Non-EU producers supplying rPET into the EU face both tariff friction and traceability complexity; JBF Belgium, as EU-sited producer, is a direct, zero-friction beneficiary of this mandatory demand pull

Geographic Sales Distribution and Logistics Cost Structure

Concentrated Exposure To Core Western European Markets Supported By Efficient Logistics Routes

Leader in Sustainability

A fully integrated sustainability strategy across the entire value chain

INNOVATION

- Patented chemical recycling technology
- Flakes-to-Resin ("FTR") recycling process recognised by both FDA and ESFA
- Continually test new products to increase rPET offering and maintain our market edge

REDUCE

- Entire production facility designed to minimize carbon footprint:
 - Local supply chain for raw materials, including on-site supply for PTA
 - Advanced MtR/FTR technology

CLIMATE & NATURE

- Continually measure emissions to ensure compliance with EU-ETS regulation on Green House Gases
- Integrated waste management system
- VAL-I-PAC member – we only work with registered members

Health & Safety

- Chemical exposure measurements across the workplace
- Standard Operating Procedures for safe execution of any work
- Significant on-the-job training delivered by experienced professionals

RECYCLE

- Up to 30% PCR content (post consumer recycled) PET capabilities
- Ahead of schedule in meeting EU sustainability goals

03 | European PET Market Dynamics

European PET Market Outlook – Structural Drivers

Demand

- ▶ PET demand expected to grow steadily across packaging applications through the decade
- ▶ Structural shift toward rPET and circular packaging solutions driven by sustainability targets
- ▶ Increasing demand for recycled content in food-grade packaging

Supply

- ▶ Industry overcapacity is accelerating rationalisation across European PET producers
- ▶ However, European producers have benefited from recent plant closures (Indorama, Netherlands), unplanned shutdowns (Alpek, UK) and periods of elevated global freight costs which impact Asian imports into Europe
- ▶ Most new global PET capacity additions are concentrated in Asia
- ▶ Global utilisation expected to stabilise from 2027 as demand growth absorbs excess capacity

Source: Wood Mackenzie Global PET Strategic Planning H1 2023, JBF Analysis

Modern, cost-efficient European producers are well positioned to benefit from ongoing market consolidation

Strategic Advantages of a European PET Production Base

Global PET film supply and demand outlook to 2050

Due to its direct customer base and long-standing relationships, JBF Belgium is able to significantly outperform the global utilisation trend and expects to approach 80% utilisation from 2027

04 | Experienced Leadership and Institutional Ownership

Strengthened Leadership and Execution Capability

Strengthened leadership team focused on operational discipline and performance

Leadership & governance reset	Operational Stabilisation and Performance Roadmap
• New commercial, finance and procurement leadership established • Simplified organisation and clearer single point accountabilities implemented • Performance-driven operating culture implemented • Clear ownership of key processes (Order-to-Cash and Procure-to-Pay) • Enhanced governance, financial control and decision-making discipline	• Financial restructuring completed and operating model stabilised • New management structure implemented supported by Davidson Kempner and Bank of America • Key appointments made to reinforce execution capacity: ➢ Managing Director ➢ VP Commercial

Simplified Ownership Structure

Standalone platform with simplified ownership structure

Organisational Structure

Ownership & Capital Structure

- JBF Belgium operates under a simple, ring-fenced UK holding structure comprising two layers:
 - Belgium HoldCo
 - JBF Belgium (*operating entity*)
- The platform today is a fully consolidated, standalone international business with no operational ties to the former Indian parent (JBF Industries)
- JBF Belgium is owned and controlled mainly by Davidson Kempner (DK) and Bank of America Merrill Lynch via secured shareholder loans, housed under UK entity that owns the three Belgium entities
- 100% acquisition of the UK Holding Company and obtain Belgium operations on a debt-free basis
- The structure ensures full control, transparent governance, and a clear separation between the Belgium operations and any legacy entities

The JBF Belgium business today represents a clean standalone platform with i) consolidated ownership, ii) strong operational assets, iii) simplified capital structure and iv) no encumbrances at the operating level

Experienced Leadership Team and Institutional Shareholder Support

Leadership team with deep experience in PET production, chemicals and international industrial operations

05 | Value Creation Opportunity

Key Unit Economics - Revenue and Cost Drivers

L6M average pricing and cost metrics | Jul-Dec 2025

Management Post restructuring BP

EBITDA recovery to €20.9m by FY29, driven by utilisation ramp-up from 51% to 82% and improved fixed-cost absorption

At normalised utilisation levels, the platform generates structurally attractive EBITDA due to fixed-cost leverage and secure feedstock access

Temporary EBITDA Compression During Controlled Utilisation Reduction

Adj. EBITDA reflects temporary utilisation reduction in CY25; recovery driven by controlled restart of second production line from Feb-26

EBITDA volatility in CY25 reflects deliberate liquidity preservation measures rather than structural demand deterioration

- Management temporarily reduced utilisation to preserve liquidity and ensure a controlled operational restart.
- With liquidity stabilised, the second production line restarts from Feb-26, enabling progressive normalised utilisation through CY26.

EBITDA Expansion Driven by Volume, Margin and Cost Discipline

EBITDA improvement driven by utilisation ramp-up, commercial discipline and cost control - not dependent on market recovery

Path to EBITDA expansion: –€11m (FY26) to +€21m (FY29)

Structural Pillars

1. Volume & Market Share Normalisation

- Rebuild stable baseline volumes in core NW European markets
- Expand direct end-user contracts and reduce intermediary exposure
- Progressive utilisation increase toward >80% operating levels
- Selective export volumes leveraging Antwerp logistics advantage

2. Margin & Commercial Discipline

- Improved channel mix through increased direct sales
- Margin stabilisation supported by secure and competitive feedstock access
- Reduced value leakage through disciplined pricing and customer selection
- Conservative assumptions for rPET contribution

3. Cost Control & Operational Efficiency

- Fixed-cost absorption driven by higher utilisation
- Continued operating cost discipline across procurement and logistics
- Working capital optimisation aligned with volume ramp-up
- Structured hedging and feedstock management

Operationally driven EBITDA expansion supported by conservative assumptions and scalable operating leverage

Path to EBITDA and Cash Generation

Break-even utilisation ~290kt; incremental volumes drive EBITDA due to high fixed-cost leverage

Key takeaways

- I Gradual and observable EBITDA performance
- II Conservative assumptions, no hockey-stick effect
- III rPET contribution conservatively modelled
- IV Cash generation strengthens materially as utilisation and working capital stabilise

From volume ramp-up to EBITDA and cash generation

	FY26	FY27	FY28	FY29
Volume (ktes)	220	310,600	330	360
Adjusted EBITDA (€k)	(10,992)	1,613	11,370	20,922
Free Cash Flow (€k)	(6,876)	1,905	7,191	17,742

06 | Next Steps

Process & Next Steps

	INVESTOR OBJECTIVE	W1	W2	W3	W4	W5	W6	W7	W8	W9	W10+
01	Evaluate the Strategic Rationale for Acquisition			<u>Non-Binding Indicative Bid Due</u>							
	On the basis of this IM, interested parties are invited to submit an indicative valuation range prior to full due diligence. Shortlisted bidders will be invited to attend Management Presentations.	Review IM • Buy vs. Build									
02	Due Diligence & Management Interaction									<u>Binding Offer Due</u>	
	Shortlisted parties attend Management Presentations, access the VDR and conduct full due diligence. The phase concludes with submission of a binding offer .				• Due diligence launch • Full data room access • Management Q&A • Site visit						
03	Negotiate & Execute Transaction										
	From Week 10 onwards, negotiate and finalise transaction terms, complete legal and regulatory requirements, and execute the Share Purchase Agreement (SPA) to close the acquisition.										Closing Neg.

Based on the information provided in this IM, RB Karesi is invited to submit a non-binding indicative valuation range following Step 1. If that range is acceptable then RB Karesi will be invited to management presentations and full diligence with access to a data room. Transaction negotiations are expected to commence from Week 10 onwards.
